Report on Teacher's Feedback

The teachers of the P.G. Department of chemistry are in the opinion that the CBCS curriculum is more interesting and more value based in comparison to the older syllabus. In our departmental library, sufficient number of reference books are available for the students and teachers.

The teachers are very much satisfied with the improved performance of their students. The group discussion and involvement of the learners in the seminars in addition to the class-room teaching is the main attraction of the department.

Now the environment in the department is conducive to teaching and we are trying to improve the quality of research work by arranging workshop/small projects on laboratory techniques.

Report on Parent Feedback

A parent- teacher meet was held in the Department on 23rd Oct 2018. The students of 1st sem (2018-2020) and IIIrd sem (2017-2019) participated in this meeting with their parents and face to face interaction was arranged in the M.Sc. class-room. After this interaction, a feedback form was distributed to the parents and they were asked to submit the filled feedback form in the office.

The parents were very happy by the initiative taken by the department for maintaining the academic atmosphere to excel their ward.

In the meeting, parents raised the problems of separate wash-room for the girl students and demanded the arrangement of purified cold-water during summer.

On the consultation with the Principal Patna science college, the wash-room ment for the girl's student of B.Sc. was made available to our girl's students. We are now trying to solve the problem of cold-drinking water with the help of university administration.
