Suggestion(s) if any

80 responses

No

No suggestions

No

Nothing

More of Practical learning should be done.

Need more teachers in the department for the proper conduct of classes

Motivation lecture for their goals by our teacher also gave one class in a week.

Teaching quality need good

Teacher should try to deal the contemporary news in class which have linked with the topic in our syllabus.

All things going good so I have no any suggestion

Along with teaching, teachers should also write.

All is well/satisfactory

Teacher are not understand the emotio of students.sometimes teacher became very selfish for personal reasons

Very burst

NA

Teachers should teach something that is beyond from syllabus

Campus environment should be improved

Communication should be better between the students and the teachers

Sab thik thak hai

Weekly quiz arrangements in the class

teachers should tolerate if students are coming late.

More focus on developing answer writing skills and communication skills of the students

It's all good

It was my pleasure to have learnt the subject by you.

Due to worst teaching methods students took the less interest and also have few attendance

Change Priyanka kumari,Ajit Kumar and some more teachers from bca department so that no lab facility no extra curricular activities nothing is done in class towards teacher they did not teach and talk about job and job related

I request to all teacher please cover our syllabus in better way

I request to all teachers please cover our syllabus in better way.

No,just want to make teachers to do fair evaluation in internal marks

Overall Moderate

Syllabus should be timely completed

Not any suggestions

Not any suggestions

All good ...

Teacher's need to listen students too and this is only done when they behave with less ego.

In the teaching style of all faculties, the theoretical part is effective but the practical part is very weak. They need to put more emphasis on the practical part, at least in the practical subjects.

All good.

.

There are certain teachers who do not acknowledge students well and communication is not upto the mark and if that is eliminated then overall it's a good learning place

Faculties must focus on teaching irrespective of college politics discussion
They must encourage us to become a better person and responsible

None

Infrastructure required repair

There must be appointment for new faculty in vacant position

I'm sure Shivani ma'am will definitely become one the most admirable professor in times to come.

Everything is good no suggestion required

Should focus beyond syllabus also.

give them training for atleast 3 month of teaching aptitude,just like they do in B.ed

Nothing

Provide various tools like projector and multimedias

Faculties need to focus more on parctical

They are the best

Good

No any suggestion, blessed to have him as my faculty.

There is timeline conduct of lectures and practical and teachers are well prepared for the lecture.

We need teacher taught us like we feel better when we read the subject where not single doubt left also try to taught us in simplified way and they try to break complex topic or matter in lucid way and in that way they delivered their lecture where students can easily understand.

nil

Using new technologies to improve teaching methods.

No any suggestions

Library has old books

Enhance pronunciation and teaching skills and abilities

Teachers have not taught syllabus in applicative manner. Some of the teachers come with their prepared notes and they just read that notes. Some of them have good command on their papers. Some are busy in just sending notes and pdfs. New generation teachers know how to teach students in applicative manner. Finally I would say that you can only pass the university exam by the method of teaching that adopted by teachers but if someone wants to clear

competitive exam he/she should work on own and go for self study and other materials such as YouTube and Online Study.

1. Teacher have to well prepared..
2. Encourage students other fields and skill.

Not Specific.

All good

#Teachers should adopt a practical approach of teaching.

#Not just teaching theoretical knowledge only, it should be applied and solved in the numerical problems classroom.

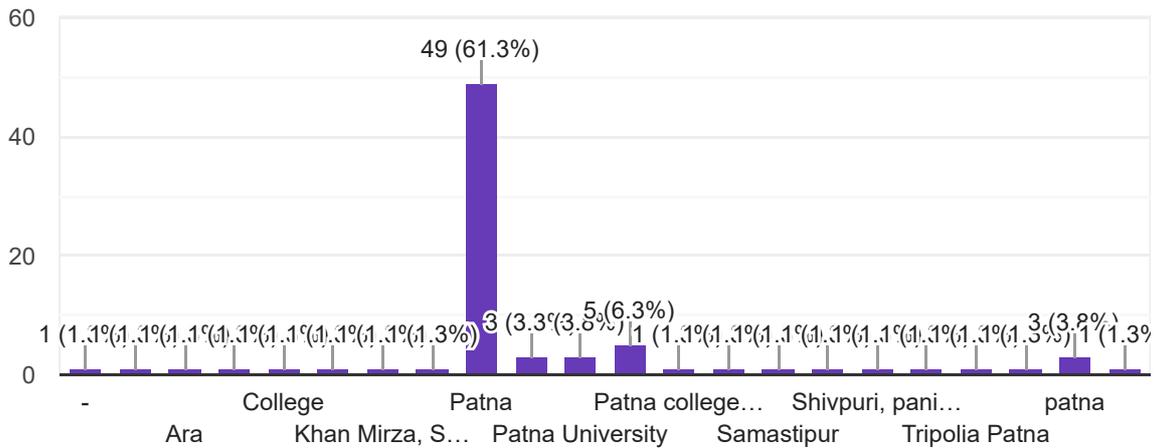

#Overall all teachers of our departments are good.

Modern resources and tools should be provide to teachers.so that they can teach effectively.
