20/1/23 7:07 INDIA PWC pupils present research findings

THE TIMES OF INDIA

B K Mishra | TNN

Patna: The students of Patna Women's College (PWC) on Thursday made a lively presentation of their research projects on topics of societal relevance under the basic science research (BSR) scheme of the UGC. Their presentations were evaluated by Mahavir Cancer Sansthan's senior scientist Arun Kumar and Patna Science College botany department head Sharwendu.

The four-hour programme was conducted in two phases. In the first phase, five groups of zoology department students presented their research findings on 'Comparative effects of artificial sweetener on blood glucose level', and 'Microbial contamination in currency counting sponges used in different banks in Patna'. Botany department students made the-

The judges appreciated the cutting-edge research projects completed by students and appealed to them to continue their passion for scientific research in future

ir presentations on 'Different land use systems on soil's chemical and biological properties of ICA- RCER Patna region', and 'Comparative study of air pollution tolerance index of some selected plants species in different localities of Patna'. The presentation

on 'Content of micro plastics in rock salt' made by the students of PG Department of Zoology was highly appreciated by the judges.

Both the judges appreciated the cutting-edge research projects completed by students and appealed to them to

continue their passion for scientific research in future so that they could be able to serve the country as great scientists.

PWC zoology department head Shobha Srivastava welcomed the guests and introduced the purpose of the presentation of findings of the young researchers.

Earlier, under the DBT (department of biotechnology)-funded star college scheme, collegians made the presentation of their research work carried out on different subjects. Ajit Kumar Singh of Patliputra University and Pushpanjali Khare of Magadh Mahila College were the judges. The research students elaborated the prospects of developing herbal mouthwash, contamination-free water, safe baby diapers, etc. PWC physics department head Aparajita Krishna thanked the guests.
